Yeah, I noticed that there is a satd dish on top of there compound. What's
matter, haven't the feds any sharpshooters who can take out a feedhorn
without making much noise? "Gee, that's a shame your satellite system
broke. Is it under warranty?"

What! And ruin the propaganda flow? Surely you know that the reason the federales haven't already shot the feed horn on the Satellite dish is because they are USING the press to attempt psy-war on the BDs. And, of course, our press corps being the lazy bottom feeders that they are, they are putting out the government line with no modifications or commentary. If the federales shot the feed horn then the 24-hour a day CNN pro-BATF propaganda fest would be over f or Koresh and his followers. That wouldn't do now would it?
